Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 10, 13-15 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by

Reger US Patent 5,258,023.

Regarding claims 1, 2 and 10, Reger discloses a prosthetic heart valve (10) comprising a

valve member (30) having a cylindrical sidewall portion, a support of a substantially flexible

material (110), a strip of pliant material (104) around valve member intermediate an inflow end

and outflow end of the valve member, a leaflet (40) and a covering (105) over a radially outer

exposed surface.

Regarding claims 13-15, Reger discloses a prosthetic heart valve (10) comprising a valve

member (20) having a cylindrical sidewall portion, a support of a substantially flexible material

(30), a strip of pliant material (104) around valve member intermediate an inflow end and

outflow end of the valve member and a covering (30) over a radially outer exposed surface.

Regarding claim 10, see attachment; and regarding claims 14 and 15, see Figs. 21 and 22.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 3

Claims 3, 12, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reger US Patent 5,258,023.

Reger discloses the invention substantially as claimed. However, Reger does not disclose a strip made of natural material and synthetic material or biological tissue material. Additionally, Reger does not disclose a valve member made of homograft or xenograft and does not disclose a support having a radial thickness.

Regarding claims 2, 3 and 12, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the synthetic material of the Reger reference with the material properties of the Applicant's invention, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Regarding claim 16, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the dimensions of the flexible material by having a thickness of less than about 0.5 mm, since it has been held that finding an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980).

Allowable Subject Matter

Claims 4-7 are allowed.

Claims 9, 11 and 17-20 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/782,702 Page 4

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The

examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
